The sead on 2012 estimates from the 2012 Virilage National Center for Health Statistics Postcersal Bidged Population Estimate file.

2 Except for the inflat death raise, mortally raises are aga-adjusted per 100,000 resident population. Denominators for the mortality raise (except for inflat death) are based on estimates from the Virilage 2009

National Center for Health Statistics returned altibigat Population Estimate file, and the 2012 National Center for Health Statistics Center for Health Statistics returned altibigat Population Estimate file, and the 2012 National Center for Health Statistics returned altibigat Population Estimate file, and the 2012 National Center for Health Statistics returned as agree per 100,000 population ages 1-17.

4 Cancer incidence raise are per 100,000 resident population. Denominators are based on estimates from the Virilage 2009 National Center for Health Statistics returned as England Population Estimate file.

3 Inflat mortality raise per 1,000 reliable Statistics Center for Health Statistics control Bidged Population Estimate file.

4 Cancer incidence raise are per 100,000 resident population considerate population control for Health Statistics control Bidged Population Estimate file.

4 Except Population Center for Health Statistics Center all Bidged Population Estimate file.
