Agenda

• Interscope Plus Overview
• Definitions and Terminology
• Users, Roles and Permissions
• New Account Instructions for Designers
• New Account Instructions for Contractors
• New Account Instructions for Owner Agencies
Interscope was originally created in 1999 for the State Construction Office for internal use in tracking projects as they moved through the office. In 2012, the decision was made to incorporate the functionality of the University System’s “CAPSTAT” Capital Project Status software into Interscope, and then further to create a state-wide Capital Project System that would be used by the University System, Community College System, and all State Agencies. Interscope+ is now that system.

Interscope+ is designed to track the life cycle of Capital Projects from the time they are authorized until they are closed out, including funding sources and HUB data. It is not intended to be an accounting system.¹

¹Interscope+ User Manual
• **Allocate**: Designating funds from an authorization to a program. All funds must be allocated to programs before the programs are active so that funds may be used for projects.

• **Amendment**: A change to a design contract.

• **Assign**: Designating funds from a program for use in a project. Funds must be assigned to a project before they can be committed or obligated for contracts or other expenses.

• **Authorization**: Approval by the relevant State governing body(ies) (legislature, OSBM, UNC Board of Governors) or County to execute a project. It includes title, description/scope, amount, funding type (general fund, non-general fund, state debt, non-state debt, R&R, R&R debt), budget code, item, center, and date. Community Colleges may have authorizations approved by the County. Authorizations may be allocated to one or more Programs.
• **Category**: Project cost estimates are delineated by 4 categories: Design, Construction, Contingency, and Other.

• **Design** represents the estimated cost of the design contract

• **Construction** represents the estimated cost of all construction contracts

• **Contingency** represents the estimated cost of construction contingency

• **Other** represents the estimated cost of project related or owner costs, such as soils exploration, advertising, fixed furnishings and equipment (FF&E), etc.

• **Change Order**: A change to a construction contract, either to the dollar amount, duration or both.

• **Code**: A 5 digit number that designates the funding authorization assigned by OSBM. The first digit is a 4, which signifies capital project. The second and third digit represents the fiscal year that the project is authorized (14 = 2014). The last two digits indicate the state agency or UNC institution. For Community Colleges that are authorized funding by the County a 5 digit number that does not start with 4 will be used.
• **Commitment**: A signed contract or Purchase Order for which the State or County is obligated to pay the stated amount.

• **Estimated Cost**: Total estimated cost of the project, broken down by category. Typically this would come from the State Construction Office OC-25 form or, for Community Colleges the NCCCS 3-1 Form.

• **Expenditure**: A dollar amount that has actually been paid.

• **Fund Source**: There are 6 different sources of funds defined:
  - **General Fund**: Appropriated funds
  - **Non-General Fund**: Receipts, grants, gifts, cash, County appropriated funds, etc.
  - **State Debt**: State Bonds, COPS, or Special Indebtedness
  - **Non-State Debt**: Bonds issued by Institutions, county, or self-liquidating funds
  - **R&R**: Funding for R&R from appropriations
  - **R&R Debt**: Funding for R&R from State Debt, such as Special Indebtedness or COPS.
• **HUB**: Historically Underutilized Businesses, and commonly used to refer to Minority Participation or Minority Business Enterprises (MBE).

• **Item**: A 3-digit number assigned by OSBM in combination with the code to form a unique identifier for an authorized capital project. Item numbers are assigned sequentially within each fiscal year.

• **Milestone**: Key date that is used to measure progress of a contract or project.

• **NCAS Center**: A unique data item of up to 8 alphanumeric characters that identifies the financial account in the North Carolina Accounting System (NCAS) related to a capital code-item.

• **Non-Code-Item Project**: A project that does not have, nor require, a capital code-item (<$300,000). These are typically small informal projects that are accomplished with local or operating funds, but recording HUB participation is required.
• **Package**: A “process container” for a construction project within the Interscope+ system which provides a place to record detailed information captured during design review, bidding, award, and the construction administration phases of a construction project.

• **Primavera (P6)**: Statewide project scheduling system. Schedules are required for projects with estimated costs over $500,000, based on Project Type.

• **Program**: A collection of one or more projects closely related by initial authorization, by the related nature of their execution, and/or having multiple funding sources for a single project. The program serves as a “bucket” for funds from different authorizations that can then be assigned to projects as needed. Program IDs are generated and assigned by the system.
• **Project**: A project is typically any work requiring a design and construction contract, and may involve construction or renovation of a single building or repairs to numerous buildings as authorized in “R&R” funding. Project IDs are generated and assigned by the system. Projects must be created in the Program from which they will be funded.

• **Project Type**: A designation based on agency/institution, dollar amount of project, funding type, and other factors that determines what oversight role SCO will exercise, such as managing design and construction contracts, reviews, etc. and the P6 schedule requirements. There are different project types based on the department/agency, authorization, and dollar amount of the project.

• **Special Project Designation**: Classification of certain projects that are not given an OSBM code-item and do not follow the typical financial controls. These include Guaranteed Energy Savings Performance Contracts, Foundation Projects, Non-Code-Item Projects, and HUB only.
Users, Roles and Permissions
• Every user must have a username and password.
• If you do not have one, refer to the State Construction Office Website

http://www.interscope.nc.gov/Interscope/Logon.aspx
• Download the appropriate form – Agencies; Universities; Designer/Contractors, for requesting a logon.
New Account Instructions for Designers
New Account Instructions for Designers

1 – Select Designer in the User Type field. This will display the entry form.
2 – Complete the form for the fields indicated.

Note: It is important that the email address entered for the Firm be one that represents the firm directly and is not necessarily defined for a particular individual since all communication from Interscope+ for this account will be sent to the email address on file.

3 – Click Submit. A request will be sent to the Interscope+ Administrator who will review your request, verify the information against the data in Interscope+, activate your account and send an email notifying you that the account has been activated.

Note: A user account cannot be established for any firm that does not have prior or current approved and active construction projects setup in Interscope+.
New Account Instructions for Designers

All fields in red are required

Instructions For Designers
Designer Users are those Companies that have engaged the State of North Carolina under contract for building projects.

Designers will only be allowed to access the data available for their company.

To create a Designer Logon:
1. Select User Type of Designer
2. Fill in all fields for your Designer
3. Your must specify a valid License from one of the following:
   (To obtain your Designer License #, go to the appropriate link below.)
   - NC Board of Architecture
   - NC Board of Engineers and Land Surveyors
   - NC Board of Landscape Architects
4. Fill in the remaining fields
5. Press the Submit button
New Account Instructions for Contractors
Note: Any Contractor requesting to use Interscope+ must first be registered with Vendor Link, the Interactive Purchasing System. Interscope+ uses Vendor Link to obtain verifiable name and address information.

To register with Vendor Link, access the following URL and complete the Vendor Registration process:
https://www.ips.state.nc.us/Vendor/VendorPubMain.aspx
Once you have received notification that your Vendor Link registration has been completed, you may request a logon for Interscope+

Follow these steps for creating a new Contractor user account:
1 – Select Contractor in the User Type field. This will display the entry form.
2 – Click on the Search VendorLink button. This will display the search page.
New Account Instructions for Contractors

3 – Enter the first 3 letters of your company name and press Search. This will display search results.

Search for your company record here.
4 – Find your company listing in the search results and press Select. This will fill in your company information and return you to the account request form.
5 – Complete the remaining fields on the form and press Submit.
Note: It is important that the email address entered for the Firm be one that represents the firm directly and is not necessarily defined for a particular individual since all communication from Interscope+ for this account will be sent to the email address on file.

6 - A request will be sent to the Interscope+ Administrator who will review your request, verify the information against the data in Interscope+, activate your account and send an email notifying you that the account has been activated.

Note: A user account cannot be established for any contractor that does not have prior or current approved and active construction projects setup in Interscope+.
New Account Instructions for Owner Agencies
New Account Instructions for Owner Agencies

Follow these steps for creating a new Agency, Community College or University user account:

1 – At the logon screen, download the appropriate request form and completely fill it out.

2 – Each Agency and/or Department should have one person designated to review and approve the requested roles/permissions.

3 – Once the completed form has been approved, submit to the System Administrator at Interscope@doa.nc.gov.

4 – The administrator will notify the requestor when the user has been set up.
New Account Instructions for Owner Agencies

When the Interscope+ system administrator creates an SCO or Owner-Agency user, the user is assigned one or more roles such as Project Manager, or Capital Project Coordinator (CPC), or Financial Manager. Each role allows the user to access specific information and perform specific actions within the system. The Menu options shown on the page header may vary based on the Role or Roles assigned to the user. As an example, a Project Manager may be able to view information only for projects within their agency or institution.

Permissions are part of roles, and determine whether the Role can add, change, delete, or only view the data on a given screen. The Project Manager role can allow the user to view the funding sources for a project but not be able to change them, but the user can change Milestone dates.

A user can have more than one Role, depending on their job requirements, and Roles can be added or deleted as job requirements change. The System Administrator must make those changes, based on requests from the appropriate management level.

This training does not attempt to identify role requirements for each type of interaction.
